

A Call to Arms...

Is your child waiting for a transplant?

Choose to
vaccinate to keep
your child healthy!

- 1 Vaccines are recommended by all transplant programs.
- 2 Vaccines can prevent infections that can increase time to transplant.
- 3 Vaccines can help keep children healthy before and after they receive a transplant.

**Don't delay - talk to your
child's doctor today!**

Ask what vaccines are
recommended for your child.
